VIETNAM NATIONAL UNIVERSITY HO CHI MINH CITY – HO CHI MINH CITY UNIVERSITY OF TECHNOLOGY

FACULTY OF COMPUTER SCIENCE AND ENGINEERING

ARTIFICIAL INTELLIGENCE (AI) USE STATEMENT

Course: CO5151 – Advanced Agentic AI (HK261)
Seminar Topic: S1-7: Agent Design Patterns & Orchestration
Presenting Group (G4): Dang Lam Tung (Lead) · Nguyen Trung Phong · Vu Viet Hung
Faculty Advisor: Dr. Le Xuan Bach

Group G4 affirms strict compliance with the academic integrity regulations of Ho Chi Minh City University of Technology (HCMUT-VNU) and the policy guidelines of course CO5151. Below is the transparent declaration of all Artificial Intelligence (AI) tools utilized in preparing Seminar S1-7 materials:

AI Tool / Model	Phase of Application	Detailed Scope of Work
Google Gemini 3.8 Flash	Language Polishing & Beamer Styling	Proofread English phrasing in the Annotated Bibliography; standardized LaTeX Beamer syntax and table alignments.
Claude 4.6 Opus + Deepseek 4.1 Flash (Antigravity IDE)	Demo Code Scaffold	Boilerplate structure and helper logic for 3 Agent architectures on Google ADK (`demo_orchestration_trace.py`).

Tasks Conducted 100% Independently by Group G4 Members (Zero AI Delegation):

1. **Formulation of Critical Theses:** The core analytical comparisons (e.g., *Workflow vs. Autonomous Agent*, *Compounding error propagation* $P = p^n$, *Lead/Subagent cost-latency explosion* ($3\times - 8\times$), and *Durable execution via LangGraph checkpointing*) were formulated directly through deep reading and debate among team members.
2. **Writing Critical Reflections:** Each single-sentence critical reflection in the *Annotated Bibliography* was authored independently by assigned team members after primary-source paper review.
3. **Architectural Decision Analysis:** The design justification and empirical benchmark for Group G4's Vietnamese Legal RAG project were derived directly from internal implementation constraints.
4. **Fact-Checking & Verification:** All mathematical equations, paper attributions, publication dates, and benchmark statistics were independently verified against official primary sources.

Ho Chi Minh City, October 18, 2026
