VIETNAM NATIONAL UNIVERSITY HCMC – HO CHI MINH CITY UNIVERSITY OF TECHNOLOGY

FACULTY OF COMPUTER SCIENCE AND ENGINEERING

AI-USE STATEMENT

Course: CO5151 – Advanced Agentic AI (HK261)
Seminar topic: S2-5: Safety & Alignment
Group (G4): Dang Lam Tung (Lead) · Nguyen Trung Phong · Vu Viet Hung
Faculty advisor: Dr. Le Xuan Bach

Group G4 commits to the academic-integrity regulations of HCMUT-VNU and to the CO5151 course guidelines. The table below discloses, in detail, how AI tools were used while preparing the S2-5 seminar material.

AI tool	Stage of use	Specific task
In-IDE AI assistant (GitHub Copilot Chat, VS Code)	LaTeX scaffolding and layout debugging	Generated the Beamer preamble skeleton (16:10, HCMUT theme), detected and fixed overfull frames/tables, normalised mathematical notation (PPO-ptx, $\mathbb{E}[\text{harm}] \leq P \times I_{\max}$), and proof-read Vietnamese orthography.
Large language model (Claude/DeepSeek-class) via chat	Cross-checking figures against primary sources	Extracted and compared figures from the abstracts and result tables of the five assigned papers (182,831 CAI prompts; 85 ± 3% InstructGPT; 14%/78% alignment faking; 5–22% scheming), and reviewed the reference list and arXiv links.

Work performed WITHOUT AI (by Group G4 members):

1. **Core critical claims:** the framing "alignment is a prior, system safety is a bound", the capability-vs-propensity distinction, and the choice of *Moffatt v. Air Canada* (2024) as the system-level failure case were decided by the group after reading the primary sources.
2. **Action-boundary design for LegalPilot-VN:** the C0–C4 classes, the deterministic escalation triggers, the hash-bound approval token and the fail-closed policy were designed by the group on top of Theme 9's own architecture.
3. **Deck architecture and division of labour:** the argument order (mechanism → limits → evidence → design), the mapping of the five mandatory items to slides, and both defence answers were decided by the group.
4. **Fact-checking:** every figure, formula and citation was manually verified against the official abstract/PDF of the five readings before being placed on a slide.

Ho Chi Minh City, November 4, 2026
